ENHANCING YOUR CRITICAL CARE SKILLS

Listen, learn and laugh a lot with Laura Gasparis Vonfrolio RN, PhD, as she covers important topics for enhancing your acute care skills in this two day program.

**DAY ONE**

12 LEAD EKG INTERPRETATION
Reading a normal EKG, identifying patterns of ischemia, injury and infarction; identifying the location of infarction, complications associated with each specific myocardial infarction and nursing interventions.

DIFFERENTIATING ECTOPY FROM ABERRANCY
Is it VT or SVT with a bundle branch block? Recognize QRS changes in V1 and MCL1 with RBBB and LBBB, recognizing SVT with a block from ventricular tachycardia.

**DAY TWO**

IV THERAPY
Parenteral solutions and their indications, complications and applications.

ABG INTERPRETATION
ABG made EZ in a two-step approach. ABG analysis, acid-base disturbances, symptomatology and treatment modalities.

NEUROLOGICAL ASSESSMENT
Quick neuro assessment, patient’s prognosis based on clinical findings, interventions to decrease increasing intracranial pressure, as well as what not to do.

BREATH SOUNDS, HEART SOUNDS & MURMURS
Differentiating normal and abnormal breath and heart sounds and monitoring them as indicators of patient progress. Also included is a thorough review of heart murmurs, their sounds, how to assess them and etiology.

ENDOCRINE EMERGENCIES
Pathophysiology and the nursing management of patients with endocrine emergencies such as DKA, HHNK, DI, SIADH, Adrenal Insufficiency, Myxedema Coma and Thyroid Storm.
